

ABHIJITH P.R

Golang Backend Developer

+91 8590988810 | abhijithpr366@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Golang backend developer with hands-on experience building scalable RESTful APIs using Gin and GORM. Strong foundation in clean architecture and modular backend design, with expertise in PostgreSQL schema design and performance optimization. Experienced in implementing secure authentication and authorization using JWT, along with structured middleware and error handling. Proficient in using Git, Docker, and Postman for efficient development workflows. Familiar with microservices, gRPC, and GraphQL, with a strong focus on writing clean, maintainable, and production-ready backend systems.

Technical Skills

- **Languages:** Golang, JavaScript, SQL
- **Backend & APIs:** RESTful APIs, JWT Authentication, Middleware Design
- **Frameworks & Libraries:** Gin, GORM, Bcrypt
- **Databases:** PostgreSQL (Schema Design, Indexing, Query Optimization)
- **Tools & Platforms:** Git, GitHub, Postman
- **Operating Systems:** Ubuntu, Windows
- **Additional:** gRPC, Microservices Architecture, GraphQL, System Design

Projects

Home4u – Furniture E-Commerce Platform

Feb 2025

Tech Stack: Golang | Gin | GORM | PostgreSQL | JWT | Bcrypt

- Architected and developed a scalable backend for furniture e-commerce using Golang and Gin, delivering high-performance RESTful APIs with optimized database queries
- Designed PostgreSQL schemas with proper normalization, relationships, constraints, and strategic indexing to ensure data integrity and query performance
- Implemented secure JWT-based authentication with Bcrypt password hashing and role-based access control (Admin/User/Guest levels)
- Developed core modules: product catalog management, shopping cart operations, order processing, and real-time inventory tracking
- Applied clean architecture principles with service-repository patterns, ensuring modularity, testability, and scalability for future feature expansion
- Integrated comprehensive middleware for request validation, structured error handling, logging, and request/response tracking
- Repository: github.com/Abhijith232373/GO-ecommerce-project

Backend Development Experience

- Built scalable backend systems using Golang, Gin framework, and GORM ORM, implementing production-ready RESTful APIs
- Designed and optimized PostgreSQL database schemas with advanced indexing strategies, relationships, and efficient query handling
- Implemented JWT-based authentication with role-based access control, secure middleware patterns, and comprehensive error handling
- Developed modular architectures using service-repository design patterns, improving code maintainability and system scalability
- Explored advanced backend concepts: gRPC for inter-service communication, microservices architecture, and GraphQL implementations
- Containerized applications using Docker for consistent development and production deployment environments
- Strengthened core competencies in DSA, memory management, goroutine patterns, and system design fundamentals in Go

Education

Diploma in Computer Engineering
Government polytechnic college pala

2025
GPA: 7.28 / 10
